I am appalled at your bogus settlement of the Microsoft Antitrust Suit!.  
How dare you agree to such a lame punishment for all of the damage that has been done to the computer industry by Microsoft. It is clear that Microsoft's political contributions to the Republican Party and the present administration was not in vain. America will see this ultimately for what it is. This is simply another example of the well heeled political contributors buying out the Justice System.

Shame on you for this Micro\$oft settlement! They have been found overwhelmingly guilty and they are going to be punished by having a few consultants lounge around the Micro\$oft campus while Micro\$oft continues their predatory practices. That will really curb their predatory practices.

If I am ever found guilty of anything, I hope to have these government negotiator\$ handle my negotiations for me.

The US DOJ is a true embarassment to the entire world.
